

**Android****Setting up a Wireless LAN (Web User Authentication) Connection for Android**

The following steps are required to use a Ritsumeikan University wireless LAN (web user authentication).

1. Wireless LAN Settings (SSID)
2. Web User Authentication
3. Logout

This manual explains the three steps to connect to RAINBOW Network through Wireless LAN (web user authentication) for Android. Please note that the network may not be available on some models.

\*This manual uses screen images of the XPERIA acro SO-02C (Android 2.3.4).

The screen images vary depending on the model, but the menu items are the same. Refer to your phone's user guide for screen images and configure settings.

The on-campus wireless LAN (web user authentication) network service for Android is available inside the wireless LAN service areas listed below.

- Kinugasa Campus (
- Biwako-Kusatsu Campus
- Osaka Ibaraki Campus
- Suzaku Campus
- Osaka Umeda Campus
- Tokyo Campus

Please note that wireless service may not be available at some facilities on each campus depending on circumstances.

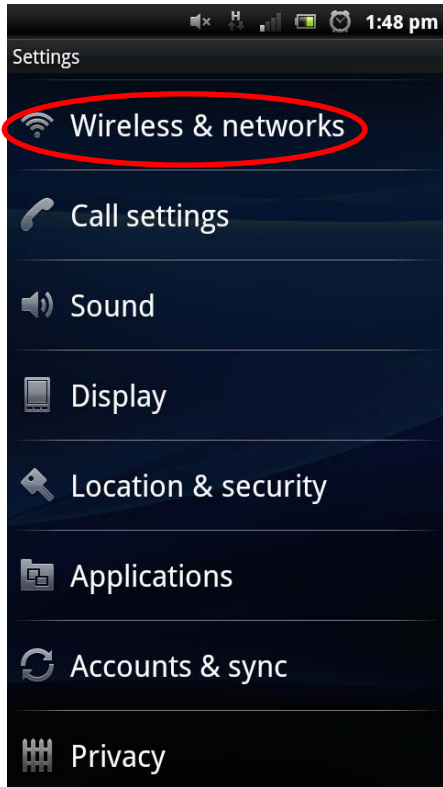

---

**How to Set Up a Wireless LAN Connection**

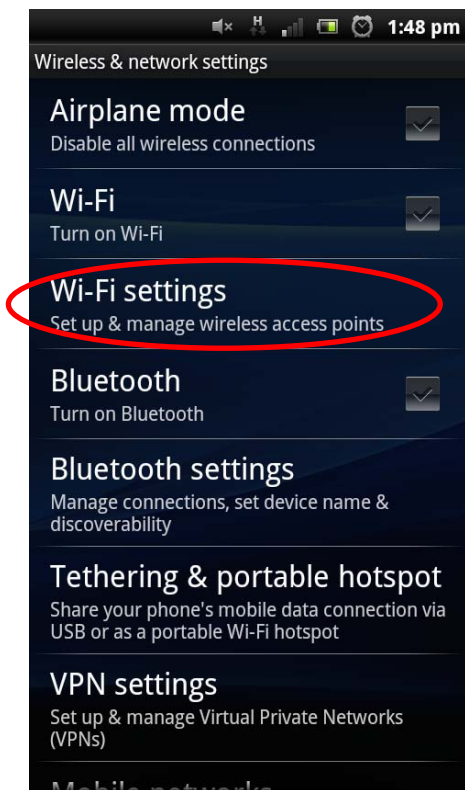

1. Wireless LAN Settings (SSID)
  - 1) Tap **Settings** in your application menu.

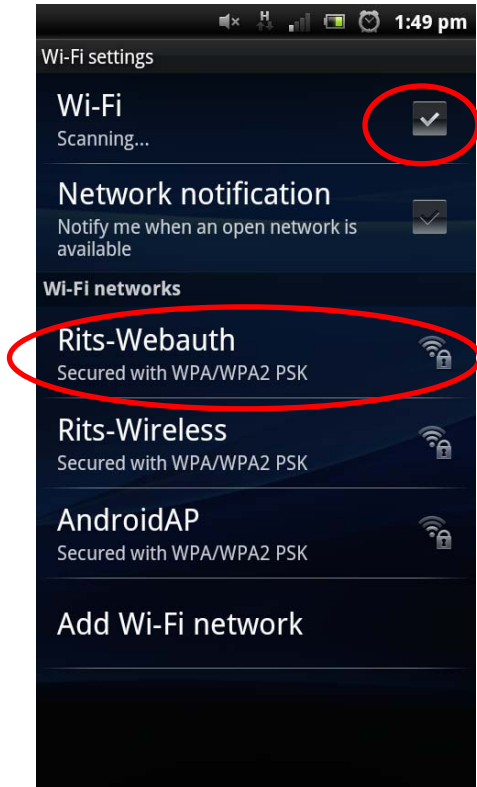

2) Tap **Wireless & networks**.

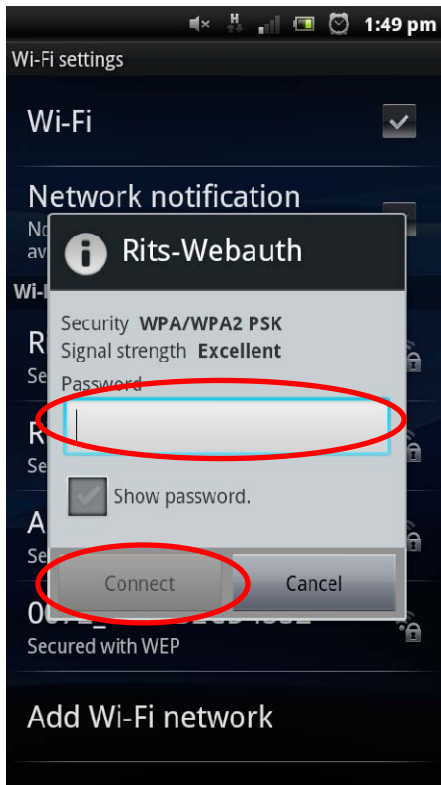

3) Tap **Wi-Fi settings**.

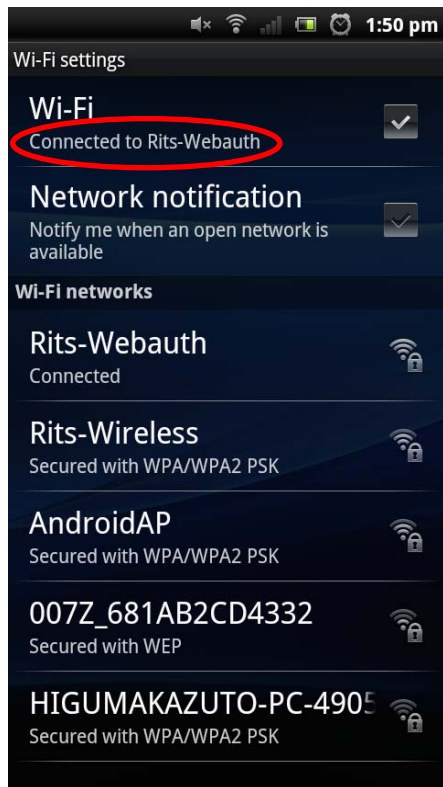

- 4) Check the box in **Wi-Fi** and tap **Rits-Webauth** when displayed under Wi-Fi networks.

- 5) Enter “webauth.ritsumei.ac.jp” for the password and tap **Connect**.

- 6) Make sure that **Connected to Rits-Webauth** is displayed under **Rits-Webauth**.

## 2. Web User Authentication

- 1) Tap **Browser** in the homescreen.

- 2) Enter your RAINBOW ID and password on the web authentication page, and tap **Submit**.

If the authentication page is not displayed, access an HTTP website again. (The authentication page is not displayed when accessing an HTTPS website.)

- 3) When authenticated, your phone is connected to RAINBOW Network.

### 3. Logout

Take the following steps to log out.

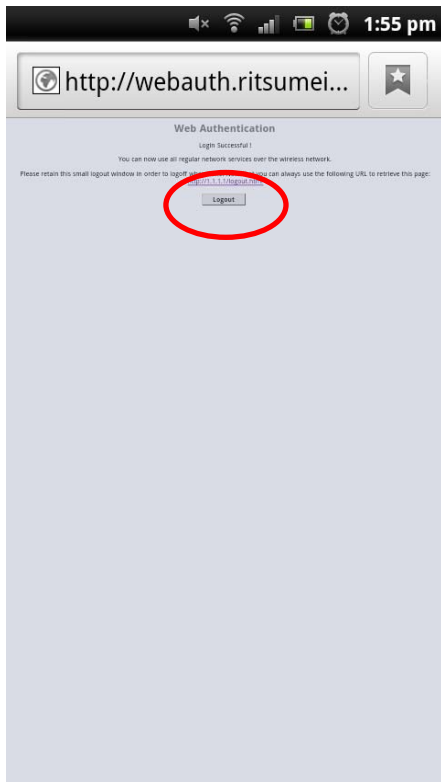

- 1) Tap **Browser** in the homescreen.

- 2) Access the logout page “<https://webauth.ritsumei.ac.jp/logout.html>”

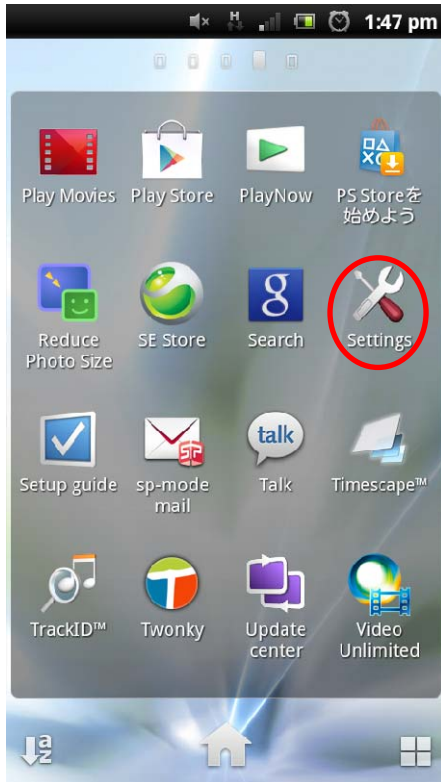

\*Bookmark this page for easy access to log out next time.

- 3) Tap **Logout** on the logout screen to end the connection.

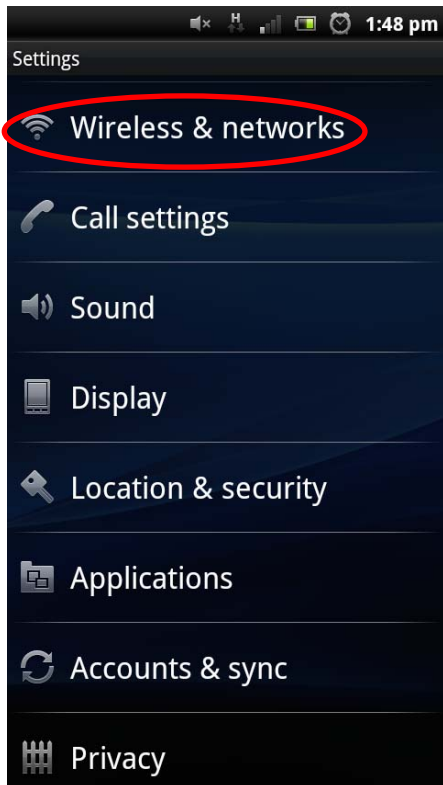

## How to Connect to the Wireless LAN after Setup is Complete

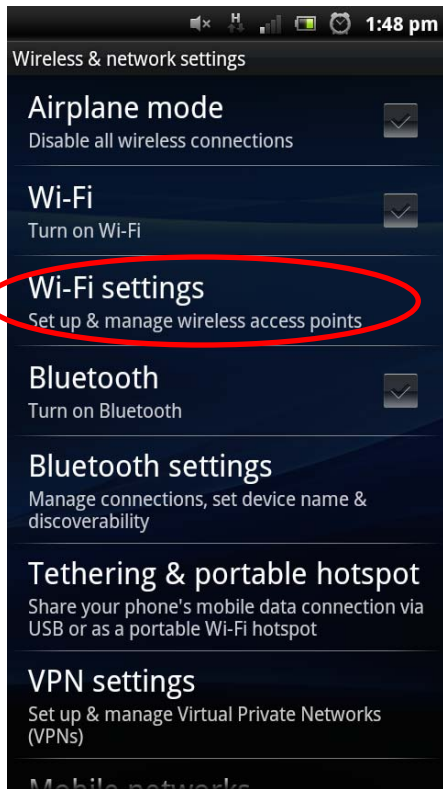

- 1) Tap **Settings** in your application menu.

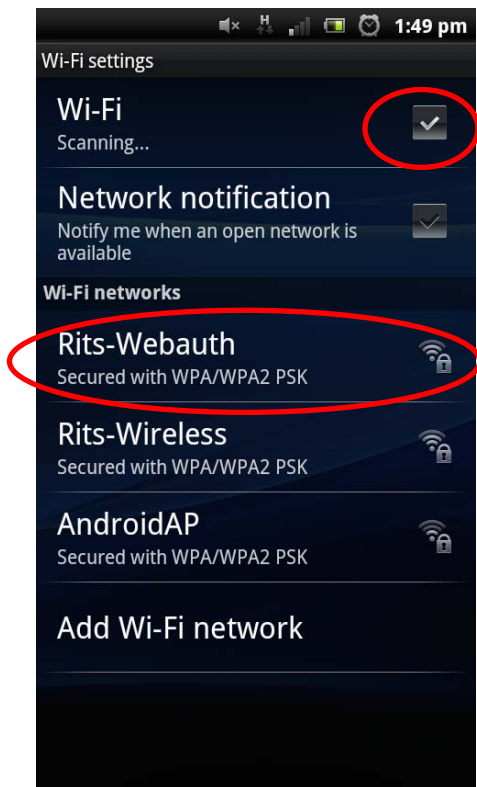

- 2) Tap **Wireless & networks**.

3) Tap **Wi-Fi settings**.

4) Check the box in **Wi-Fi** and tap **Rits-Webauth** to instantly connect to the network.

- 5) Tap **Browser** in the homescreen.

- 6) Enter your RAINBOW ID and password on the web authentication page, and tap **Submit**.

If the authentication page is not displayed, access an HTTP website again. (The authentication page is not displayed when accessing an HTTPS website.)

- 7) When authenticated, your phone is connected to RAINBOW Network.
